P.I.D.C Karachi Pakistan | +92-3062767-542 | alijutt030627@gmail.com | [Linkedin](#) | [Github](#)

About Me

Full Stack Engineer specializing in MERN & MEAN stacks with strong experience in React, Next.js, Angular, and Mobile App Development (React Native). Skilled in building scalable applications using Node.js, Express.js, NestJS, and databases like MongoDB and SQL. Experienced with cloud services on Amazon Web Services, serverless architecture, and modern tools like TypeScript, Tailwind, and CI/CD to deliver high-performance web and mobile applications.

Expertise

- **Front End:** React, Next Js, Angular, HTML, CSS, JavaScript, React-Native, Redux, TypeScript, MUI, Tailwind Css, Bootstrap
- **Back End:** Node.js, Express Js, Mongo DB, SQL lite, TypeORM, ServerLess Backend, NestJS, Rest APIs
- **Others:** Github, Vercel, AWS, AWS S3, AWS Lambda, Firebase, Redux, VPS Deployment, Jira, Stripe, Nx Mono Repo, Relational Databases, Project Management

Experience

kaj Consultancy

Sep 2023 - Present

Front & Back End Development

- Developed front-end web applications using React JS and React-Native, enhancing user experience by creating interactive user interfaces
- Translated design concepts into responsive web applications using React JS and Firebase, improving user interface performance and accessibility

Code With Ahsan | <https://www.codewithahsan.dev/mentorship>

Mentorship

- Mentored aspiring developers in Full Stack Web Development, Mobile Applications, Backend Systems, and UI/UX Design through practical project-based guidance.
- Conducted one-on-one mentoring sessions focused on problem-solving, debugging, project structuring, and industry best practices.
- **Skills & Technologies:** Full Stack Development, React.js, Node.js, Express.js, Mobile Development, UI/UX Design, System Architecture, and API Integration.

Matrix Tech Software Solutions

Dec 2022 - Dec 2023

MERN Stack | React Native Developer

- Developed and maintained full-stack web applications using the MERN stack, improving user engagement and reducing page load times
- Collaborated with cross-functional teams to gather project requirements, translate them into technical specifications, and implement responsive front-end interfaces with React.js, integrating RESTful APIs for seamless communication between components.
- Developed cross-platform mobile apps using React Native, combining native functionality with a unified codebase to enhance user experience
- Collaborated with team members to transform project visions into responsive React.js interfaces, integrating RESTful APIs to improve communication between front-end and back-end systems

Jawan Pakistan

Dec 2022 - Aug 2023

Assistant Mentor - MERN Stack Development

- Assisted in conducting MERN Stack development training sessions for students, providing guidance on MongoDB, Express.js, React.js, and Node.js.
- Supported students in problem-solving, debugging, and troubleshooting their MERN Stack projects, fostering a collaborative learning environment.

Projects

Index Pos Web App And Mobile App

- Implemented a **comprehensive Chart of Accounts** module to streamline financial tracking and accounting flow.
- Deployed and maintained the system on **Hostinger VPS** with **Nginx**, **PM2**, and **dockerized microservices**.
- Integrated **barcode scanning**, **offline mode**, and **multi-branch access** to support retail operations
- **Tech Stack:** Mono Repo, NestJS, Angular, MySQL, TypeORM, Node.js, Docker, Nginx, PM2, AWS, TailwindCSS, React Native, Redux Toolkit, Axios, REST API, CLI, AsyncStorage

FIR System (Web Application)

Final Year Project

- Developed a centralized web-based FIR Management System to digitalize the process of filing and tracking police complaints
- Built interactive interfaces for **users, officers, and admins** to register FIRs, assign cases, and monitor progress in real time.
- Integrated analytics dashboards to display statistics such as total, pending, and resolved FIRs, enhancing transparency and efficiency
- **Tech Stack:** SQL, Express.js, React.js, Redux Node.js, VPS, AWS RDS(Database) (MERN Stack).

Baitullm Web App And Mobile App

- Developed a complete attendance management system for private schools with both web and mobile applications.
- Implemented secure teacher and student authentication, allowing teachers to mark daily attendance and view class records instantly
- Integrated synchronization between mobile and web apps using REST APIs, ensuring data consistency and offline accessibility for teachers
- Integrated **QRcode scanning** and mark the attendance automatically
- **Tech Stack:** Mono Repo, NestJS, Angular, MySQL, TypeORM, Node.js, Docker, Nginx, PM2, AWS, TailwindCSS, React Native, Redux Toolkit, Axios, REST API, CLI, AsyncStorage

Slotlf | Premium Sports Court Booking System

- Developed a robust full-stack sports court booking platform enabling users to find, compare, and instantly reserve sports venues (**Cricket, Football, Tennis, etc.**).
- Implemented secure role-based authentication for three distinct user types: **Players, Court Owners, and Administrators**, ensuring secure data access and management.
- Engineered a **dynamic slot generation and peak-pricing engine** that allows owners to manage hourly availability and apply variable pricing based on demand.
- Integrated a secure manual **payment verification** workflow using Cloudinary for receipt uploads and automated logic to expire unpaid bookings after 10 minutes.
- **Tech Stack:** NestJS, React.js, MySQL, TypeORM, Node.js, Cloudinary, Redux Toolkit, Axios, REST API, TailwindCSS, Shadcn/UI, Lucide Icons, Vite.

Inventory Management & POS System

- Eliminated inventory errors by **automating real-time stock updates for raw and assembled products**.
- Built a high-performance **POS with “Recall Bill”** to speed up transactions during peak hours.
- Improved **financial visibility with Ledger & Financial modules tracking payments and balances**.
- Simplified **BOM handling by auto-deducting raw materials on product sales**.
- Implemented PDF receipts for instant **proof-of-sale** and better compliance.
- **Tech Stack:** NestJS, React, TypeScript, MySQL, TypeORM, Tailwind CSS, Ant Design, JWT, Axios, TanStack Query, Recharts, Nginx, PM2.

Premium Currency Converter | [Live On Google](#)

- Developed a Chrome Extension for instant **real-time currency** conversion directly on webpages.
- Designed a modern glassmorphic UI with **a floating tooltip-based instant conversion experience**.
- **Integrated live exchange rate APIs** for accurate and fast global currency conversions.
- Implemented **privacy-focused client-side processing** using Chrome extension APIs and JavaScript.
- **Tech Stack:** JavaScript, Chrome Extension APIs, HTML5, CSS3, REST APIs, Real-Time Currency Exchange Integration.

Education

Sindh Madressatul Islam University
Bachelor's Degree, Computer Science

2021 - 2025
